CHALLENGE #8: EXTERNAL CSS AND RESPONSIVENESS

HTML source code

```
    <!-- Responsive viewport -->
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
```

```
<!-- External CSS -->
<link rel="stylesheet" href="style.css">
```

CSS source code

```
@media screen and (max-width: 750px) {

    .page-layout {
        grid-template-columns: 1fr;
        padding: 0 25px;
        gap: 20px;
    }

    .sidebar {
        position: static;
        margin-right: 0;
    }

    .hero-content h1 {
        font-size: 38px;
    }

    #navigation ul {
        gap: 5px;
    }

    #navigation a {
        font-size: 13px;
        padding: 7px 10px;
    }
}
```

```
@media screen and (max-width: 500px) {

    .page-layout {
        padding: 0 16px;
    }

    .color-list {
        grid-template-columns: 1fr;
    }

    .gallery-grid {
        grid-template-columns: 1fr;
    }

    .content-card {
        padding: 22px;
    }

    #story {
        padding: 25px;
    }

    .hero-content h1 {
        font-size: 32px;
    }

    .home-intro {
        padding: 25px;
    }
    .home-intro h2 {
        font-size: 24px;
    }
}

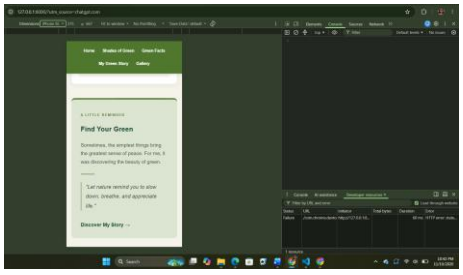

/* ========================================
   REDUCED MOTION
   ======================================== */

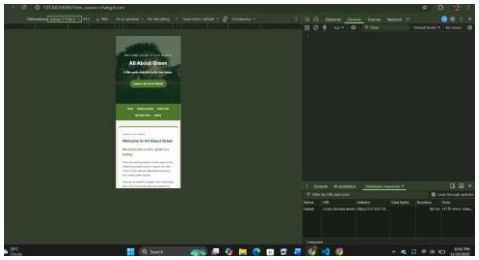

@media (prefers-reduced-motion: reduce) {

    html {
        scroll-behavior: auto;
    }

    #navigation a,
    .gallery-item img {
        transition: none;
    }
}
```

Website Output

The website uses responsive design to automatically adjust its layout, content, and navigation based on the screen size. It works properly on mobile phones, foldable phones, tablets, and desktop computers, providing a clear and user-friendly viewing experience
